Instructor's Agreement

Statement of Intent From PURELAND SECURITY To Instructors:

We strive to provide instructors certified through PS (Pureland Security) with opportunity to teach for the sake of influencing students positively and the development and deepening of good attitude, knowledge and ability as an instructor.

As organizations tend to experience the challenge of managing personnel issues and balances, we must put our first priority on building and preserving quality instruction in a harmonious and respectful environment for the sake of the student's reception of valuable information. It is held as imperative at PS that the relationship with and service to the student not be jeopardized by complications in instructor dynamics.

Therefore, we strive to help instructors operate successfully as a part of this team by providing clear ground rules, being attentive and available for the positive resolution of issues through the vehicle of communication.

Quality Officer: Is a support to the group's healthy and joyful operation at or above the required levels of quality of instruction including **respectful conduct** towards students and co-instructors.

Instructor Agrees To: Be progressive by striving to develop as an instructor of firearms and safety knowledge. Work as a positive and functional part of a valuable team by understanding the team objectives, by being prepared for class, by being punctual and by demonstrating commitment to the use of communication to maintain harmony and quality.

To accept instruction towards their fulfillment of team objectives. To make adjustments if needed, in ways of dealing with students and/or instructors for the sake of team excellence.

To accept, in a fair and reasonable spirit, a limited duty-window that may be provided to permit the demonstration of a change in approach, or removal from the group if no remedy to points of conflict is put forth. Should this occur, the instructor may later apply to be accepted to return to instruct with PURELAND SECURITY.
