Guy Masterson, a Grand Valley resident, teaches a class titled "Refuse To Be A Victim" on Saturday at the Blue Star building in Grand Junction. He and his wife, Suzanne, have been presenting the National Rifle Association seminar for the past three years.

Develop a defensive mind-set

NRA seminar taught by Grand Valley couple helps even those who don't own firearms

By CHARLES ASHBY

Charles.Ashby@gjsentinel.com Don't be paranoid that everyone out there is determined to victimize you, just be aware that some will if you aren't paying attention.

That's the underlying lesson that Guy and Suzanne Masterson try to teach.

HOW TO AVOID PROBLEMS

The NRA's "Refuse To Be A Victim" course offers numerous tips:

- Install effective door and window locks on your home.
- Install bright lights outside the home that have motion detectors.
- Use lamp timers inside the home when away for several days
- Learn as much as possible about places you vacation to know where to
- go when arriving.
- Photocopy important items in your wallet.

If confronted by a mugger, consider dropping your purse or wallet and running away.

Use more complicated computer passwords.

own firearms.

"We address in every class we do that it's important to have a healthy defensive mind-set, so you're safe but not paranoid," said Guy Masterson, a regional

insight to have a safe level of awareness."

The couple said criminals are more likely to target easy victims, so putting as many deterrents in their way helps mini-

ily, which wanted her to become more aware of how to avoid bad situations.

"I learned that by just taking a couple of extra steps, you can prevent a lot of bad things from happening," she said after taking the course Saturday. "That can be from buying a better lock for your door or buying a better door. I never thought that someone would take advantage of newspapers piling up or snow being around the house. It now occurs to me that it makes sense."

The three-hour course, which doesn't emphasize the use of guns but doesn't dismiss them either, is offered monthly for free.

The Mastersons also give

Grant will help finish Fruita's new bike park

By DUFFY HAYES Duffy.Hayes@gisentinel.con

The dusty berms, rollers and jumps at the relatively new Fruita bike park may be covered with snow, but some big additions to the park are planned for after the melt-off.

The city of Fruita has received a grant from Great Outdoors Colorado to finish construction of the final details of the bike park along Colorado Highway 340 north of the Colorado River. It opened to the public in spring 2011.

"It's going to really be a full-service, neighborhood park when we're done," said Ture Nycum, Fruita parks and recreation director.

To get to that stage, plans call for a number of improvements and additions, Nycum said.

Turf grass will go in, providing a decidedly un-dusty space in which to hang out. Two new shelters will be built with barbecue grills. And what Nycum described as a "naturescape" playground — massive boulders with connective ropes between them, among other natural features, for kid climbing — also is planned.

Bikes always need tweaking, so two bike repair workstations are going to be provided. Have a flat tire, and you'll have access to a stand and tools to get rolling again.

A unique addition to the park will be the xeriscaping demonstration garden. where people who are considering the water-minimizing landscaping technique can see examples that work and what they look like.

The xeriscaping section will be a project coordinated with the Ute Water Conservancy District and Colorado State University Cooperative Extension Service, which are among a number of community organizations in support of the bike park.

Plateau The Colorado Mountain Bike Trail Association, whose volunteers helped build the park's features, and the Colorado Riverfront Commission wrote letters of support to Greater Outdoors Colorado, and the Western Colorado Conservation Corps made an in-kind donation of \$1,500 and will send a youth crew to work at the park for a week or two.

"It gets a lot of people invested in the park and leads to people taking care of it, too," Nycum said about all the groups involved.

The amount of the grant is more than \$244,000, and the city of Fruita will spend \$105,550 on the improvements as part of its 2013 capital projects budget.

Nycum said the city aims to have the upgrade finished by the end of the summer or in the early fall. City officials will finalize the specific plans and construction scheduling in the next month or two.

Progress slow but steady for in-state water deal

By DENNIS WEBB

The Grand Valley couple of 13 years have been teaching the National Rifle Association's "Refuse To Be A Victim" seminar for the past three years.

The couple also are certified instructors for other courses, including for concealed and carry permits, but this one is helpful even for people who don't

counselor of the program and a volunteer firefighter. "We don't increase fear. we minimize fear through the training that we do. We get people who are very terrified to people who are 23year Marines. Sometimes they just want to know how to help a loved one, and sometimes they just want to refresh their own mize you as a target.

The two offer common-sense tips on how to avoid becoming a victim — everything from remembering to secure your house before leaving on trips to being careful to whom you give personal information.

Isabel Menapace, 15, took the course at the behest of her fam-

Negotiations to finalize a sweeping in-state water agreement for the Colorado River Basin continue to drag on, but holdout Western Slope entities have conditionally approved it pending resolution of outstanding issues.

The proposed deal was announced in April 2011 and involves Denver Water and more than 30 Western Slope entities. In September, Peter Fleming, general counsel for the Colorado River Water Conservation District, based in Glenwood Springs, expressed hope that it would be finalized by the end of October. But final approval continues to await the conclusion of negotiations on two major issues — the senior water right for Xcel Energy's Shoshone Power Plant in Glenwood Canyon and future administration of Green Mountain Reservoir near Kremmling.

Conditional approvals to the overall deal have been given by the river district and all Grand Valley entities involved with the it.
